

## Suggested Resources for Coping with Persistent Pain

Please find below a list of resources that other children, young people and families have found useful in the past. We hope that you find these helpful.

**Suggested Apps** Breathing, mindfulness and relaxation can be useful skills to develop to help children and young people cope with pain. These can be practiced with help from the apps below.

| App                                                                                                      | Helpful for...                                                                                                                                                                                                                                                        |

| <p>Children's Health Scotland offer online groups called <b>SMS: Connect</b> to help you to improve the relationship you have with your health and build your confidence and self-esteem. By taking part you can develop skills that can help you cope better with your health condition and give you an opportunity to connect with other children and young people with health conditions. You can refer yourself to the group on the website below.<br/> <a href="https://www.childrenshealthscotland.org/service/smsconnect/">https://www.childrenshealthscotland.org/service/smsconnect/</a></p> |    |
| <p>There are free stress management classes called <b>Stress Control</b> available to those aged 16+<br/> <a href="https://services.nhslothian.scot/stresscontrol/Pages/default.aspx">https://services.nhslothian.scot/stresscontrol/Pages/default.aspx</a><br/> <a href="https://stresscontrol.org/stress-control">https://stresscontrol.org/stress-control</a></p>                                                                                                                                                                                                                                  |  |
